JetBacker Magnesium-Oxide Board

5 Reasons to Choose JetBacker for Your Projects:

- FIRE RESISTANT
- TERMITE RESISTANT
- MOISTURE RESISTANT
- CONTRACTOR-FRIENDLY
- ENVIRO-FRIENDLY

Advancing construction innovation is what JetProducts is all about. Our exterior and interior building components are part of a growing new class of products called Mag-Oxide (MgO) Board. Patented manufacturing technology is used to create a product that is quickly defining the future of cement-based tile backer boards. Here’s why:

**Innovation**
- Gypsum-free
- Advanced Magnesium cement replaces ordinary Portland cement
- Solid construction - no laminations
- Manufacturing technologies driven by leading-edge US patented formulas

**Performance**
- Non-toxic material - safe to cut
- Resistance to fire, moisture and wood boring insects
- Lightweight - easy to nail and screw
- ASTM & ANSI tested

**Sustainability**
- Less energy required to manufacture - CO₂ captured during the process
- Long lasting materials – reducing repair and replacement costs
- No silica-based Portland cement
- Post-consumer recycled content
